OUR SERVICES:

Online Surveys

Cost-effective, reliable, and great for accessing hard-to-reach populations. Ideal for complex or sensitive topics, as respondents can take their time with questions and provide longer, more detailed answers.

Interactive Voice Response (IVR)

Automated phone surveys that are quick and cost-efficient. Respondents use their phone's keypad to submit answers to pre-recorded survey questions.

Live Telephone Interviewing

Best for longer, more complex surveys. In ridings or regions with large proportions of non-English speakers, multilingual live calling is necessary.

Focus Groups (In Person & Online)

Roundtable discussions with 6-8 participants, led by a moderator. Online options allow remote participation with real-time observation.

Multi-modal

Large-scale surveys across multiple channels, including phone, text, and online. All channels are managed in-house, ensuring the flexibility to integrate and adjust methodologies as needed.

Key Informant Interviews

In-depth, one-on-one interviews to explore opinions and uncover new insights through follow-up probing.
